The Problem

Market Gap Analysis

- Only 15-24% of retail day traders actively trade crypto
- Millions more want to trade stocks/crypto but fear the process
- Barriers: Complex interfaces, steep learning curves, lack of community support

Key Statistics

- 95% of new traders fail within first year
- 78% cite "complexity" as primary barrier
- 89% prefer "community-driven" platforms

The YOREE Solution

1. Abstract the core components of building a trading strategy through dropdowns, tl:drs, and visuals.
2. Access an easy UI that pipelines substrings that concatenate into a system prompt and is fed into an agentic auditing framework that is preprocessed for trading crypto.
3. Allows users to craft, personify, testnet, succeed, market, and then sell their strategies for capital and/or YOREE tokens.

Agentify the Strategy Marketplace (YOREE's Sauce)

The implementation of the agentic framework for strategy building is just the start. The next step will be agentifying the deployment of personalized and backtested strategies in a marketplace.

YOREE's Agentic Future (v-2.0)

Future Vision

- Develop an architecture to best optimize the user experience and pipeline agents in a discretionary manner.
- Eventually create a portal that onboards active crypto traders to stock trading.
- Connect brokerages and exchanges to enable users to have cross-asset synthetic ETFs comprised of both crypto and stock holdings based on extensible strategies.
